

WELCOME TO A PLACE THAT'S FULL OF LIFE.

As soon as you arrive here, you'll feel it. This is a growing place with big plans – more than £10 billion of investment underway. New developments across the region are attracting international healthcare businesses to locate here alongside our growing local successful companies.

Health and Life Sciences companies that share our passion for research and discovery will be impressed by the quality and quantity of world-class R&D that is conducted here. Our schools, colleges and universities are working alongside big pharma and start-ups to build an exceptional talent pool.

Key Facts

6 million workforces within an hour

Big data hub and the UK's most powerful R&D supercomputer

8,000 core life science students

First life science technical college in the UK

Most specialist's hospitals and health centres in the UK outside London

Largest concentration of bio-manufacturing in Europe

£10 investment planned in the city region

We are investing billions of pounds in our health ecosystem that offers countless opportunities from research, drug discovery, and clinical trials through to bio-manufacturing.

The unique convergence of major assets in science, technology, manufacturing and digital innovation is creating a melting pot of ideas and ground breaking solutions.

Our global leadership in health and life sciences is driving innovation in specialist areas such as: Infection, Precision Medicine, Children's Health, Veterinary Science, Healthy and Independent Living, Big Data, Sensors and Internet of Things.

With hundreds of medical companies based here, the area is part of the Liverpool-Manchester life sciences corridor, which is considered to be one of the UK's top three clusters of biomedical activity.

We are pioneers in healthcare research and development. Some of the world's smartest people are working alongside global companies to push the boundaries of medical knowledge. The University of Liverpool has been at the forefront of world-shaping research for 130 years and the Health and Life Sciences Faculty has globally renowned institutes specialising in:

- Ageing and Chronic Disease
- Clinical Sciences
- Infection and Global Health
- Integrative Biology

- Life and Human Sciences
- Psychology, Health and Society
- Translational Medicine
- Veterinary Science

Liverpool has Centres of Excellence that facilitate powerful, productive collaborations between university academics and industry experts from around the world. These include several National Institutes for Health Research (NIHR) and Medical Research Council (MRC) centre.

We're perfectly positioned as a location for medical research and trials. With around seven million people and a diverse ethnic mix, the North West of England enjoys clinical trial recruitment rates second to none in the UK. Our world-class research hospitals work alongside industry expertise offering the ability to address all stages of clinical trials.

Given the strength of our life sciences credentials and manufacturing pedigree, it shouldn't be a surprise that we're home to one of Europe's largest concentrations of bio-manufacturing. Major pharma players include AstraZeneca, Baxter Healthcare, Bristol Myers Squibb, Eli Lilly, Nestle Health Science, Seqirus and Unilever, all have facilities in the area.
